

EBESB01

Mounted Breathalyser System

The EBESB01 is an unmanned breathalyser used to check for alcohol on the breath of workers at turnstiles, entrances to sites, offices, mines, refineries and warehouses.

A Pass result will allow access to the premises and a Fail result will prevent access.

FEATURES

- Links with biometric identification terminals
- An optional red beacon light or siren can be added to identify FAIL attempts
- An optional camera can be fitted to the unit to take a picture of every individual or only individuals that test positive
- Detachable front casing for easy calibration or repairs
