

# EBESB01

## Mounted Breathalyser System

The EBESB01 is an unmanned breathalyser used to check for alcohol on the breath of workers at turnstiles, entrances to sites, offices, mines, refineries and warehouses.

A Pass result will allow access to the premises and a Fail result will prevent access.

### FEATURES

- Links with biometric identification terminals (EBZ500-series and EBZ101)
- Reports on breathalyser events/blows can be generated on the ERSBio Cloud platform
- Detachable front casing for easy calibration or repairs

### SPECIFICATIONS

Display System	Multiple LED's
Power Supply	220V AC or 12V DC
Tests Per Minute	Approximately 12
Audible Alarm	Advises of change in display status

Operating Temperature	-5°C to 40°C
Storage Temperature	-15°C to 55°C
Dimension	265 x 160 x 100 mm

### COMPATIBLE BIOMETRIC DEVICES

EBZ500-SERIES

EBZ101

### ADDITIONAL ACCESSORIES

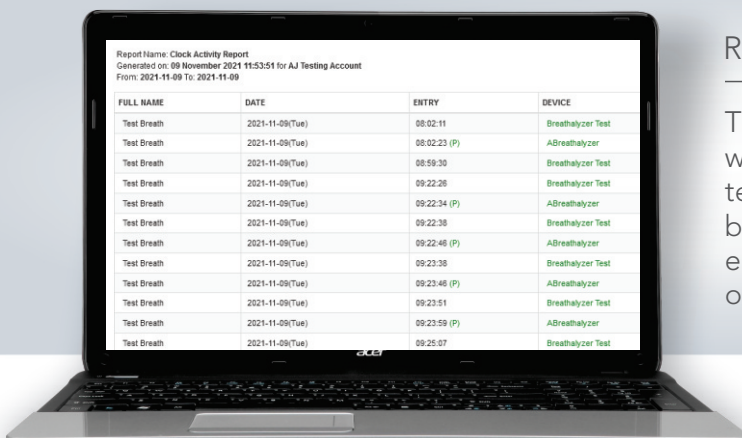

CABINETS

LIGHTS

SIRENS

### REPORTING (OPTIONAL)

The breathalyzer can be set up to communicate with our online reporting system. All breathalyser test/blow events will then display and can be broken down according to date ranges, specific employees, or departments. This includes positive or negative results.

\*Please note that the breathalyser can also be installed as stand-alone, without an access control element.
