

GUARD

PATROLLING MANAGEMENT

IMPROVE YOUR PREMISES SECURITY & ENGAGEMENT

Routes, Checkpoints & GPS Tracking

Guards on duty clock-in with NFC Technology and GPS Tracking on App.

Job Orders

Guards can receive ad-hoc requests during the tour.

Report Incidents

Guards can report incidents complete with photo and voice message instantly.

Emergency Contact

List security supervisors or person-in-charge for an emergency.

Panic Button

Send notification to emergency contact persons when it is triggered.

Offline Mode

Record patrolling data in offline mode. Data will sync once the connection is reestablished.

Notification Alert

Receive notification alert if guards are late or too early for each checkpoint.

Checkpoints Engagement

Pre-set a question for each checkpoint for the guard to answer upon checking in.

PATROLLING IoT HARDWARE

Rugged device

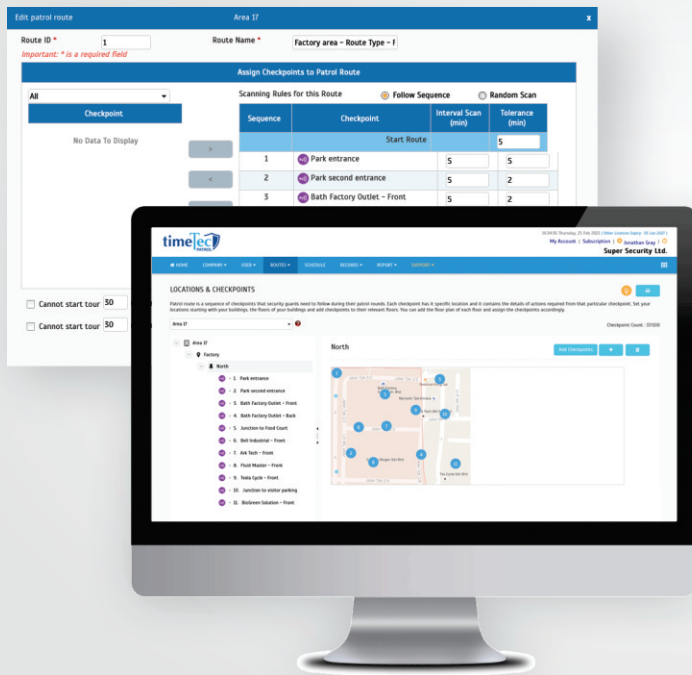

Beacon (Checkpoint)

NFC Tags (Checkpoint)

SIMPLIFY PATROL MANAGEMENT

Routes & Checkpoints Setup

Set a fixed patrol route for guards or request to patrol at random routes.

Tardiness Settings

Set a range for guards or receive alerts if guard patrol out of scheduled time.

Incident Management

Manage each incident and assign a different PIC for different matters.

Geo Fencing

Alert supervisor when the guards are outside of the area.

Real-time Monitoring Dashboard

Get all details in real-time, track guards and patrol records anytime, anywhere.

Manage Security Guards & Employees

Manage guards accessibility and hierarchy.

ADVANCED REPORTING & PATROLLING DATA

10+ Patrol Reports

More than ten automated reports, showing the data you require.

Patrol Schedule Details

Stores each clocking data even if the check-in is accidental.

Data Audit List

No alteration of the patrol records allowed, and edited records by the admins stand out.
